

E-Commerce Sales Dashboard

Corporate Project Report | Power BI

Prepared By: Lavi Kumar

Table of Contents

1. Business Problem
2. Dataset & Data Model
3. DAX Measures
4. Dashboard
5. Visual Analysis
6. Key Insights
7. Recommendations
8. Tools & Skills
9. Conclusion

Business Problem

- Monitor Revenue
- Track Orders & Customers
- Identify Top Products & Categories
- Analyze Payment Methods
- Evaluate Delivery Performance
- Support Data-driven Decisions

Dataset & Data Model

Tables: customer_Sheet, order_Sheet, transaction_Sheet, product_Sheet, delivery_Sheet, rating_Sheet.

Relationship: Customer→Order→Transaction with Product, Delivery and Rating linked by Order/Product IDs.

DAX Measures

Total Customers = `DISTINCTCOUNT(customer_id)`

Total Orders = `DISTINCTCOUNT(order_id)`

Total Revenue = `SUM(amount)`

Average Order Value = `Revenue / Orders`

Average Delivery Time = `AVERAGE(delivery_time_mins)`

On-Time Delivery % = `Delivery <=25 mins / Total Deliveries`

Late Delivery % = `Delivery >25 mins / Total Deliveries`

Dashboard Overview

Blinkit Sales Dashboard

Total Customers
10K

Total Orders
20K

Total Revenue
36M

Average Orders Value
1.81K

Average Delivery Time
34.21

Late Delivery Time %
61%

On-Time Delivery %
39%
